ABOUT ME

My specialties are Python and C# since University.
Highly skilled and experienced software engineer with 7+ years of expertise in Python Django, C# as the backend and HTML, CSS, JavaScript, TypeScript, and React.js as the front-end. Demonstrated success in developing and maintaining robust web applications.
Proven ability to work in fast-paced environments and deliver high-quality code.

WORK EXPERIENCE

Sep 2021 - Present

Software Engineer

Eventbrite provides event management and ticketing website that allows users to browse, create, and promote local events. This service charges a fee to event organizers in exchange for online ticketing services, unless the event is free

Achievements:

- Led the development of complex web applications using Python Django and React.js
- Developed and maintained RESTful and gRPC APIs for seamless communication between front-end and back-end services.
- Implemented responsive design principles for optimal user experience
- Worked on AWS development using AWS Lambda, Amazon SQS, Amazon DynamoDB, and Amazon SES.
- Mentored and guided junior developers to help them grow professionally and contribute effectively to the team
